Dear Customer,

We are pleased to inform you that your new Silkbank Credit Card is powered by Chip & PIN and Contactless Technology. Chip & PIN is the next evolution of electronic payments in Pakistan, helping to make the already safe credit card payment system even more secure and with the new contactless feature on your Silkbank Credit Card; transactions are now faster and more convenient.

How Chip & PIN works:

Chip & PIN cards together with chip-enabled terminals make a secure transaction system even more secure by validating both the card and the cardholder electronically. The overall process is easy and extremely safe.

 <p>STEP-1: Insert your card into the chip-enabled terminal and leave it there.</p>	 <p>STEP-2: Follow the instructions as they appear on the screen and enter your PIN when prompted.</p>	 <p>STEP-3: Wait for the transaction to be completed.</p>	 <p>STEP-4: Remove the card from terminal & you're on your way</p>

How Contactless works:

Contactless technology enables safer and faster transactions. Contactless transactions* do not require you to swipe or dip your card at POS (Point of Sale) terminals, making your purchase experience more convenient. Since your card never needs to leave your hand, contactless transactions are also more secure. Contactless cards use RFID (radio-frequency identification) or NFC (near field communication) to make secure payments. These cards require only close proximity to NFC enabled POS terminals to successfully complete a transaction.

* Only available at supported POS (Point of Sales) terminals.

 <p>STEP-1: Look for the contactless pay symbol on the POS Terminal to verify that it is a contactless-friendly terminal</p>	 <p>STEP-2: Tap your card against the symbol on the terminal until the light turns green Note: You may be required to enter the PIN to complete the transaction Enter the PIN (if required)</p>	 <p>STEP-3: A message on the screen or a beep will indicate successful payment</p>

- Never disclose your PIN to anyone.
- Choose a PIN that's easy for you to remember and known only to you. You should also consider changing your PIN from time to time.
- Avoid using numbers that can be easily inferred from your personal information such as your date of birth, address, your vehicle registration number, phone number, etc.
- Do not write down your PIN or store it electronically.
- Always shield the PIN pad when entering the PIN.
- If you suspect that your PIN has been compromised, change it immediately by visiting by calling our helpline no. 021-111-100-777.

Frequently Asked Questions

What is a Chip & PIN card and what are the benefits?

A Chip & PIN card is a credit or debit card with a microchip embedded in it. The chip is encrypted and provides enhanced security and protection to help guard against fraud. When used at stores or restaurants with chip-enabled terminals and at ATMs, the system validates the chip and the PIN, helping to ensure a more secure transaction. The addition of a personal identification number (PIN) provides an extra layer of security above and beyond the chip as only you know your PIN.

What is a Contactless card and what are the benefits?

A Contactless Card is a credit or debit card which uses embedded RFID (radio-frequency identification) or NFC (near field communication) to make secure payments. Since these cards require only close proximity to NFC enabled POS terminals to successfully complete a transaction, contactless transactions are faster and more convenient.

Why are Chip & PIN cards more secure?

The enhanced security of a Chip & PIN card comes from the chip itself as it is encrypted and employs a range of security features and measures that work in concert with each other to create a multi-layered defense against card fraud. When Chip & PIN cards are used at chip-enabled terminals, the transaction system identifies the cardholder through the Chip and the PIN. The enhanced security features of Chip & PIN cards make them virtually impossible to replicate and therefore less likely to be a target for criminals.

Why are Contactless transactions more secure?

Contactless transactions do not require you to handover your card to the merchant for contactless transactions. Since the card never even needs to leave your pocket, important information including card number, expiry date and CVV code is kept safe. For a successful contactless transaction to occur, a contactless card must interact with a contactless-enabled terminal. Contactless cards use secure keys to generate one-time electronic signatures and cryptograms. This makes contactless transactions on your Silkbank Credit Card just as secure as a Chip & PIN transaction.

What if I accidentally come in contact with a contactless terminal while in possession of my Silkbank Chip & PIN Contactless card? Will I end up paying for someone else's transaction?

No. The card needs to be very close to the contactless terminal. Furthermore, for a transaction to occur, the merchant needs to enter the amount which needs to be approved by you, followed by holding the card over the terminal.

Will all POS terminals accept contactless transactions?

No. Only terminals enabled for contactless transactions and displaying the contactless symbol (☐) will accept contactless transactions.

What information does a Chip & PIN card contain? Is the information private?

Chip & PIN cards contain an embedded microchip which holds the same information that is currently contained on a magnetic stripe card (card number, cardholder name and expiry date), which is also the same information that is embossed directly on the card. Chip & PIN cards also contain added risk parameters and security keys to enable PIN transactions and to provide added protection.

How will making a purchase with my Silkbank Chip & PIN credit card work at non-contactless terminals?

When you make a transaction at a chip-enabled terminal with your Silkbank Chip & PIN credit card, you're in control. The process is quick and easy and your card should never leave your sight:

1. Rather than swiping your card, it will be inserted into the terminal and left there for the entire transaction. Removing the card will terminate the transaction.
2. You will follow the prompts on the screen and enter your PIN instead of verifying the transaction with your signature.
3. When the transaction is complete, you will remove your card when prompted and wait for the receipt.

If the merchant does not yet have a Chip & PIN enabled terminal, you will sign the receipt as you do today.

How will making a purchase with my Silkbank Chip & PIN credit card work at contactless enabled terminals?

When you make a transaction at a contactless-enabled terminal with your Silkbank Contactless credit card, the process is quick & easy and your card should always be on your person:

1. Rather than swiping or dipping your card, you will simply need to tap it on the contactless symbol on the terminal and wait for the light to turn green.
2. If required, you may be prompted to enter your Credit Card PIN. You may enter your PIN.
3. A message on the terminal screen or a beep will indicate that the transaction is successful, and a receipt will be generated.

Will I still be required to enter PIN for contactless transactions?

For transactions above a certain threshold, you may be required to enter your credit card PIN. This threshold will be defined by merchant's acquiring bank and may be revised from time to time as per the rules and regulations of the acquiring bank and the State Bank of Pakistan.

Can my Silkbank Chip & PIN Contactless credit card be used everywhere?

Yes, your Silkbank Chip & PIN Contactless credit card can be used anywhere in the world where the payment brand (Visa or MasterCard) is accepted.

- At a chip-enabled terminal, you will insert your Silkbank Chip & PIN contactless credit card into a chip reader, follow the prompts and enter your PIN to complete the transaction.
- At a contactless-enabled terminal, you will tap your Silkbank Chip & PIN contactless card on the terminal, follow the prompts and enter your PIN (if required) to complete the transaction.
- If you are using Silkbank Chip & PIN credit card at a location that does not yet have a Chip & PIN enabled terminal, your transaction will be completed with your signature as you do today.

How do Silkbank Chip & PIN Contactless credit cards work for transactions made online or over the telephone?

Silkbank Chip & PIN Contactless cards are powered by Verified by VISA (VBV) and will continue to function as per the existing practice for online and telephone transactions. Upon conducting the transaction, you will be routed to the secure Verified by VISA webpage where you will be asked to select options (via SMS, Email or both) related to receiving One Time Password (OTP). On selecting the desired option, you will shortly receive the unique password on your mobile phone and/or email address. You will be routed to the next screen where you will be prompted to enter the OTP and press submit. On submission, your transaction will be processed. Please note that One Time Password (OTP) is not the same as PIN.

Will all merchants know how to process a Chip & PIN and/or Contactless transaction?

When a terminal is upgraded to accept a Chip & PIN and/or contactless transaction, the merchant will receive training from the terminal provider. Although the transaction process is straightforward when the terminal prompts are followed, it is a change that will take time for everyone to get used to. We also know that many merchants employ a wide variety of full and part-time staff who receives varying levels of training. Your transaction might be the first one for the server and it could take a little longer for them to complete (especially if they engage a colleague or manager for help). Your patience in these situations is appreciated.

What should I do if the store or restaurant insists that I sign the receipt after I've already entered my PIN?

When completing a Chip & PIN transaction, there's no need to sign the receipt because the PIN serves as the validation. During the transition, some merchants may still ask for a signature. Even though it's not required, we recommend that you sign the receipt to avoid any disruption. This will only be a temporary practice until all merchants become more familiar and comfortable with the new process. You will however still be required to sign your receipt when the magnetic stripe on your card is swiped or where Chip & PIN enabled terminal is not installed.
