Close Comfort

ENERGY-SAVER AIR CONDITIONER

Close Comfort PC9 is a new type of portable, energy-saving air conditioner featuring revolutionary patented Australian technology. You can save 85% or more of your air conditioning electricity bill.

Simply plug it in, place it near you, raise the air deflectors and you will experience instant cooling. PC9^{plus} has a remote control for convenient operation.

Close Comfort runs on a UPS. Relax in uninterrupted comfort every night, unaware of load shedding. Awake refreshed after sleep with open windows and fresh air all night long. Your air conditioning electricity bill will be Rs 1000 - 1500 per month (8-10 hours use daily).

The PC9 series air conditioners use 300 Watts (1.3 Amps), the same as a few light bulbs. Using patented air delivery technology, Close Comfort creates a cool refreshing micro-climate around you. You can save thousands of rupees a month as you no longer need to cool unoccupied spaces and walls.

Features

- Easily portable at 17 Kg, with four wheels
- No pipes, no installation, no consumables, no water.
- PC9^{plus} has DC inverter technology, remote control, variable fan speed, cooling and super-quiet operation.

How It Works

Keep windows and doors open for fresh air. Turn off your ceiling fan. Set up Close Comfort to direct a gentle flow of air past the face and upper body.

The cooling can be shared for a small group of people seated together. For sleeping, set up Close Comfort to direct the cool air over the bed.

Close Comfort comes with a Bed Tent

Use our optional bed tent for amplified cooling above 29°C room temperature. The tent also provides chemical-free mosquito protection.

The bed tent provides comfort in the hottest summer months, and can reduce PC9^{plus} energy consumption to 170 Watts, depending on thermostat settings. Use the tent on your roof and sleep in air conditioned comfort under the stars!

Warranty

36 months on compressor, 24 months on other parts

 facebook.com/CloseComfortPK/

Where does the warm air go?

Close Comfort exhausts a gentle stream of warm air up to the ceiling where the heat and humidity dissipate without warming the room perceptibly. With high energy efficiency, the warm air produced is barely noticeable and does not require an inconvenient pipe out the window, like normal air conditioners.

What is the BTU rating?

2500 - 3500 BTU/hr (0.25 ton). Normal room air conditioners produce more cooling but waste it cooling the walls, ceiling and floor.

What size room does it cool?

Close Comfort works in any room, even outside in sheltered places.
